

## **First Single-handed Around the World non stop without assistance on a 21 feet boat**

### **Alessandro Di Benedetto leaves the Bay of Biscay and heads toward the Canary Islands.**

Alessandro goes farther than his most optimistic previsions as he sails past the Canary Islands much earlier than he had expected. He is now heading toward the Cape Verde.

*‘ At the moment I am 715 miles from Cape Verde ( for the landsmen about 1 300 km), my average speed is 5 knots although yesterday from the top of a 21 feet I reached 11 knots and I was so proud of my boat that I took pictures of the event to illustrate this record!’*

Alessandro’s voyage is going on without mishap and on board Findomestic Banca everything is all right except : *‘ ...Again I am having problems with the automatic pilot, I used the extra one and tomorrow I will try to change it definitely if the weather is all right.’*

Let’s remind the readers that today at 7.15 p.m. Alessandro will be on air, live, on Radio 2 Rai – Caterpillar.
